Experienced Analytics & Data Science Leader | BI Strategy | Enterprise Dat a Platforms Expert

- **Analytics and Data Science leader with 18+ years of experience** driving enterprise data transformation, BI modernization, cloud analytics platforms, and advanced analytics across global organizations. Currently serving as Director - Analytics at Sigmoid, leading multi-stream analytics programs spanning marketing, pricing, e-commerce, data quality, and supply chain for B2B MedTech and life sciences clients.
- **Proven track record** of translating business priorities into scalable data products, governed self-service BI, forecasting and attribution solutions, and AI-enabled decision support. Trusted partner to senior stakeholders across the US, Europe, and APAC, with strong experience in delivery governance, account growth, vendor management, and mentoring cross-functional analytics and engineering teams.

Core Competencies

- Enterprise Analytics Strategy & Roadmaps
- Data Architecture, Modelling & Data Quality
- Generative AI, LLM & Knowledge Systems
- Advanced Analytics, Forecasting & Attribution
- Product & Program Ownership
- Executive Stakeholder Management
- Delivery Governance, Team Leadership & Account Growth

Skills

Data Science & AI: Predictive Analytics, Statistical Modeling, Time Series Forecasting (ARIMA, SARIMA, ETS), Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), semantic search

Cloud & Data Engineering: AWS Glue, Lambda, Step Functions, EventBridge, Scalable Pipelines, ETL/ELT pipelines, Azure Function

Databases & Programming: AWS Redshift, Snowflake, MySQL, PostgreSQL, MS SQL Server, Lambda, Python, SQL, VBA Macros

Business Intelligence: Tableau, Power BI, Spotfire, Semantic Models, Dashboarding, Reporting Automation, KPI Framework

Work Experience

Director - Analytics • Sigmoid Analytics • Bengaluru, India — Mar '26 – Present

Lead analytics strategy, solution delivery, and account expansion for global B2B MedTech and life sciences programs.

- Lead a multi-stream analytics portfolio covering omnichannel marketing, campaign performance, attribution, pricing, e-commerce, data quality, and supply chain, aligning delivery with commercial and CMO priorities.
- Define annual analytics roadmaps and convert complex business problems into scalable BI, data engineering, and data science products with clear executive, managerial, and operational KPI layers.
- Direct expansion of regional Omnichannel Power BI solutions and integration of campaign analytics with Last-Touch Attribution, Multi-Touch Attribution, and customer journey insights to enable action-oriented decision making.
- Lead pricing analytics initiatives across price leakage, contract and rebate analysis, price-cube development, and extraction of unstructured commercial documents; supported an $800K rebates use-case win and the addition of two billable resources for six months.
- Establish Power BI governance through standardized KPI definitions, reusable templates, visualization guidelines, adoption metrics, role-based training, and deployment practices to reduce development effort and improve self-service analytics.
- Guide cross-functional analytics, data engineering, and data science teams; manage delivery risks, quality, stakeholder communication, mentoring, proposals, POVs, and account-growth opportunities.
- Advise on Databricks-based data quality monitoring, consolidation of profile and drift metrics, and executive dashboards across large multi-table data estates.

Senior Manager, Data Science • MSD Pharmaceutical • Pune, India — Jul '22 – Feb '26

Lead enterprise-wide modernization of BI platforms, AWS-native & Databricks data engineering pipelines, and forecasting analytics capabilities supporting global commercial and medical teams.

- Led enterprise analytics platform development and guided 10+ engineers and analysts to deliver scalable, high-visibility solutions aligned with global business priorities.
- Defined analytics strategy and roadmaps, translating complex requirements into data models, information-delivery products, and measurable business outcomes.
- Architected AWS-native pipelines using Glue, Lambda, Step Functions, EventBridge, and Redshift, improving processing efficiency by 30% and reducing reporting latency across markets.
- Reduced Power BI refresh time from 2 hours to 15 minutes through semantic modeling, optimized ETL, and workload orchestration.
- Championed governed self-service BI through visualization standards, semantic models, KPI definitions, and reusable Power BI datasets adopted across regions.
- Modernized forecasting using ARIMA, SARIMA, ETS, and ML-based models, including a bring-your-own-data capability for agile scenario planning.

- Established metadata dictionaries, data catalogs, governance controls, and audit-ready workflows; managed global vendors and senior stakeholders across the US, Europe, and APAC.

Senior Consultant • Deloitte India (Offices of the US) • Bangalore, India Mar '14 – Jul '22

Delivered BI modernization programs, data engineering solutions, and cloud strategy engagements across Pharma, Life Sciences, Consumer Products, and Manufacturing clients.

- Led end-to-end analytics & visualization program delivery, aligning data solutions with evolving business needs and digital transformation goals.
- Conducted design thinking workshops, journey mapping, and wireframing to shape analytical products and organizational data strategies.
- Presented insights and recommendations to senior leadership, influencing strategic and operational decisions across global engagements.
- Built SQL/Python-based ETL pipelines and multi-source data integrations, improving data quality, lineage, and automated refresh cycles.
- Designed scalable data models powering Power BI/Tableau dashboards, accelerating insights.
- Co-ordinated onsite–offshore teams, ensuring agile sprint governance, stakeholder alignment, and high-quality delivery.
- Mentored 5+ junior consultants, uplifting capability in SQL, BI tools, storytelling, and delivery best practices.
- Supported RFP/RFI cycles, building prototypes, POVs, and architecture blueprints that contributed to multi-million-dollar wins.
- Represented Deloitte onsite in Japan, driving client workshops, requirement engineering, and solution blueprinting resulting in stronger adoption and project expansion.

Senior Business Analyst • EMC Corporation • Bangalore, India Aug '09 – Feb '14

Specialized in analytics for product quality, testing, reliability modeling, and automated operational insights.

- Defined and tracked KPIs for product quality (test pass rate, defect density, closure timelines) enabling data-driven QA improvements.
- Applied statistical models including Weibull & Hubbert for reliability predictions and lifecycle analysis.
- Built interactive dashboards and visual analytics accelerating insight delivery for product and QA teams.
- Architected centralized reporting servers and SQL/Python pipelines ensuring automation, consistency, and governance.
- Served as the single point of data support across four global sites, automating manual workflows to meet scaling demands.
- Implemented ETL processes improving data reliability, traceability, and operational responsiveness.

Academics & Credentials

Liverpool John Moores University, Liverpool, United Kingdom | Master Jan '24 – Apr '25
Artificial Intelligence and Machine Learning

- Completed advanced coursework and practical projects focused on applying machine learning and AI techniques to real-world business and engineering problems.

Utkal University, Bhubaneshwar, India | Bachelor Apr '00 – Jul '03
Economics

- Completed a rigorous academic program with a strong foundation in economic theory, quantitative analysis, and applied statistics

Awards

ACE Performer Award – MSD (2023)
Recognized for leadership and delivery of enterprise-scale analytics solutions.

Outstanding Performance Awards – Deloitte (2016, 2017, 2019)
For consistent excellence across analytics programs.

Applause Awards – Deloitte
Multiple recognitions for high-impact analytics deliveries

Silver Award – EMC
For designing a metrics server advancing product quality and data-driven decision making.
